June 17, 2009

Dear Michael,

It is with great pleasure that I write this letter expressing my appreciation for your excellent work on the renovations of the McDowell Colony Dining Hall and Administration Building in Peterborough, New Hampshire. Having Bruss Construction join the team early in the design process provide excellent value in making sure the project was completed successfully.

As an old building that has served the Colony for almost 100 years we as a team were given the challenge to modify the building to meet today's needs and requirements, while making sure we retained its beloved character. Your continued input into how to achieve our goals while making the building more energy efficient was incredible. Your success in keeping the building occupied while doing a major renovation was truly a miracle.

Many thanks to all at Bruss Construction for making the renovations at the MacDowell Colony a real success.

Best regards,

Sheldon K Pennoyer, A.I.A. LEED AP
